

DRYERS - CONTROLS

EASY CONTROL

- The Primus EC timer offers 3 basic programmes – low, medium and high temperature.
- Changes can be made to temperature, time and residual moisture level.
- One-touch cycle selection, for simple user operation.
- Display indicates, selected program and remaining time.
- For maintenance and repair situation display shows code of errors. This function, guarantees you fast and efficient problem diagnosis.
- This computer has been designed to be interchangeable with other models within the Primus range.

EASY CONTROL – COIN VERSION

- The Primus EC timer offers 3 basic programmes – low, medium and high temperature.
- Changes can be made to temperature and time.
- One-touch cycle selection, for simple user operation.
- Display indicates, selected program, pre-paid time value and remaining time.
- For maintenance and repair situation display shows code of errors. This function, guarantees you fast and efficient problem diagnosis.
- This computer has been designed to be interchangeable with other models within the Primus range.

FULL CONTROL

- The Full Control timer that yields unlimited possibilities.
- Microprocessor has virtually no limits when it comes to setting up drying parameters! This allows changes to be made to drying or cool down times, temperatures, reversing or residual moisture level.
- There are up to 20 different drying processes that can be preset into the computers memory. This allows the machine to be set up as economical and energy efficient for all possible processes.
- This multilingual timer lends itself to easy programming by simple question / answer prompts that appear on the screen.
- For maintenance and repair situation, the FULL CONTROL has an incorporated self diagnostic system, which displays and highlights errors. This function, guarantees you fast and efficient problem diagnosis.

SENSODRY®

- Another unique option is the SensoDry® system. This is an integrated system of measurement of the residual moisture which makes the dryers ideal for SoftWash® - Primus wet cleaning system.
- The user can initially program the required moisture level and the machine will then stop when the desired level of dryness is achieved. Eliminates the need to continually stop the machine and manually check the dryness by hand.

RADAX®

- Combination of radial & axial airflow
- Lower energy costs
- Higher efficiency
- Maximal heat transfer

The company Primus bvba preserves the right to change the machines and the specification in this leaflet at any time, without prior notice. Details and photographs are only for information and never binding.
